PROPOSED FACEBOOK MESSENGER FEATURE

Near-Circle Friend

Mission & Product Purpose

OUR MISSION

Help people turn existing online friendships into meaningful, mutually welcome connections in real life.

WHY IT MATTERS

Facebook helped bring friendships online. Yet seeing someone's posts or exchanging occasional messages can sometimes stand in for meeting face to face. Social media did not create this challenge alone, but it helped shape how we maintain relationships. Near-Circle-Friend proposes the next step: use digital connection to encourage genuine human reconnection.

HOW NEAR-CIRCLE-FRIEND HELPS

Through consent-based nearby-friend discovery, verified walking routes, and optional Meta AI-powered suggestions, the feature helps people recognize timely, low-pressure opportunities to catch up with friends they already know. Geospatial discovery is the core innovation; AI adds context. People always decide whether, when, and with whom to meet.

OUR PROMISE

We are not building another reason to spend more time on a screen. We are building a reason to step away from it—and spend more time together.

Facebook connects us online.
Near-Circle-Friend brings us together in real life.

LESS SCROLLING. MORE LIVING. CLOSER FRIENDSHIPS.
